CAR 74.0.0

IDC5 CAR 74.0.0

The **IDC5 CAR 74** software update includes, once again, a large number of diagnostic developments, the best of TEXA's multi-brand diagnosis dedicated to cars and light commercial vehicles. Using **IDC5 CAR** during your daily workshop activities means having an avant-garde solution, rich in new diagnostic possibilities, special functions and technical information that are essential for completing even the most complex workshop operations professionally and with full customer satisfaction.

IDC5 CAR 74 includes the update of 73 makes. New diagnostic systems have been developed for these makes, which have never been released previously, and involve over **990 models**. The work of TEXA's technical developers also led to further increasing the coverage of **ADAS**, **electric** and **hybrid vehicles**, the **interactive "DASHBOARD" screens** and **wiring diagrams**.

MAIN NEW FEATURES INCLUDED IN THE IDC5 CAR 74.0 VERSION

- **ADAS DEVELOPMENTS AND IMPLEMENTATIONS: RCCS 3;**
- **NEW DASHBOARD FEATURES IN THE TGS3s SYSTEM GLOBAL SCAN;**
- **NEW DIAGNOSTIC CONTENTS: TEXPACK CAR and
TEX@INFO Guided Diagnosis;**
- **NEW IDC5 NEWS SECTION;**
- **HYBRID / ELECTRIC VEHICLES**

To learn more about the extraordinary coverage made available by TEXA, visit the website:
www.texa.com/coverage

IDC5 CAR 74 also includes the new features released through the continuous updates 73.1, 73.2, 73.3 and is characterised by over 11.000 new possible selections for the major makes on the market worldwide, among which:

ADAS DEVELOPMENTS AND IMPLEMENTATIONS: RCCS 3

RCCS 3 is the great innovation by TEXA for the calibration of ADAS. The unit, designed and engineered by TEXA is available in two versions: RCCS 3 with Monitor and RCCS 3 with Panels.

RCCS3 with Monitor is equipped with a **75-inch HD screen, 4K definition**, that offers an optimal display, respecting the **1:1 proportion ratio in line with the specifications of every manufacturer**. It is also important to highlight that it does not deform nor resize the images. This way, workshops are sure they are operating in the most correct and safe way, without risking to alter the vehicle's behaviour on the road.

RCCS 3 with Monitor communicates with the IDC5 software and guides mechanics, step by step, towards the quick and automatic identification of the vehicle. The panel is selected and set in the monitor, without any possibility of error. Thanks to the continuous software updates, that each time offer new vehicles and possibly new panels, and to the essential help sheets edited by make and model, users are certain they can complete all operations with maximum precision and properly, counting on an extraordinary coverage.

RCCS 3, as mentioned, can also be purchased in an "entry level" configuration with Panels. It has the same exclusive features of the top-of-the-range version but requires the use of physical panels in place of the monitor. This allows using the TEXA panels and accessories dedicated to calibration to complete all operations with maximum customer satisfaction.

DASHBOARD FEATURES IN THE TGS3s SYSTEM GLOBAL SCAN

The CAR 74 update introduces a new type of DASHBOARD. This can be viewed after a TGS3s scan and will indicate, in a simplified and intuitive way, a schematic diagram of the different control units in the vehicle and the related communication lines.

Select the TGS3s function.

From the detected errors screen, press the DASHBOARD button.

NEW DIAGNOSTIC CONTENTS: TEXPACK CAR and TEX@INFO Guided Diagnosis

IDC5 CAR 74 software update introduces two important novelties, which further expand the offer of diagnostic coverage and technical information for repair specialists.

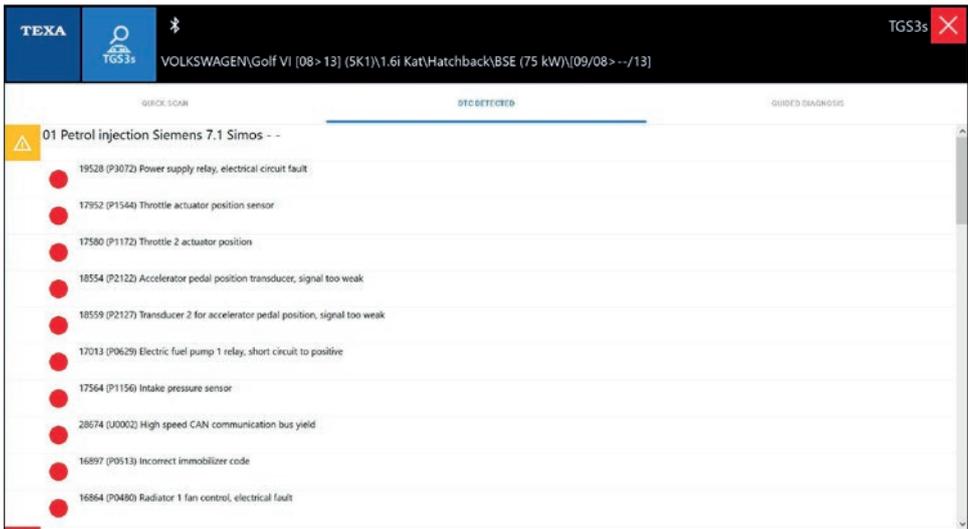

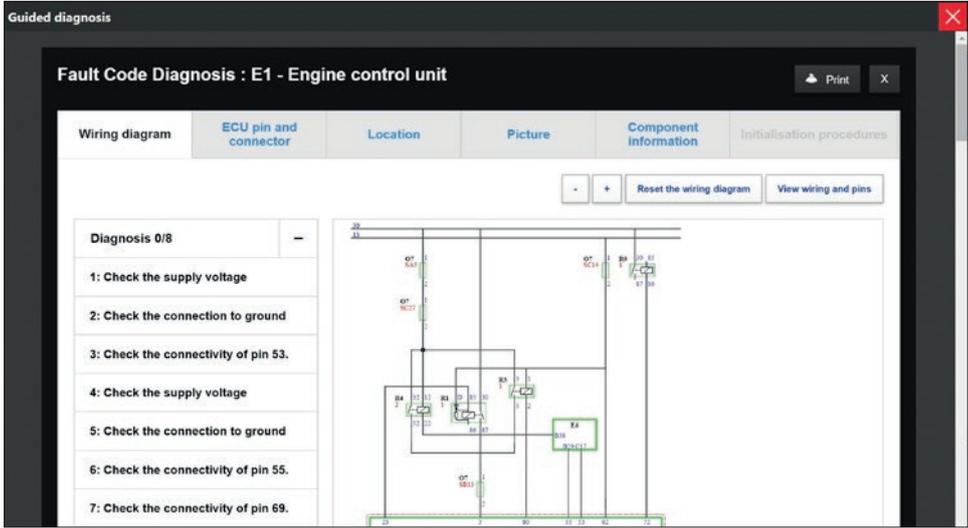

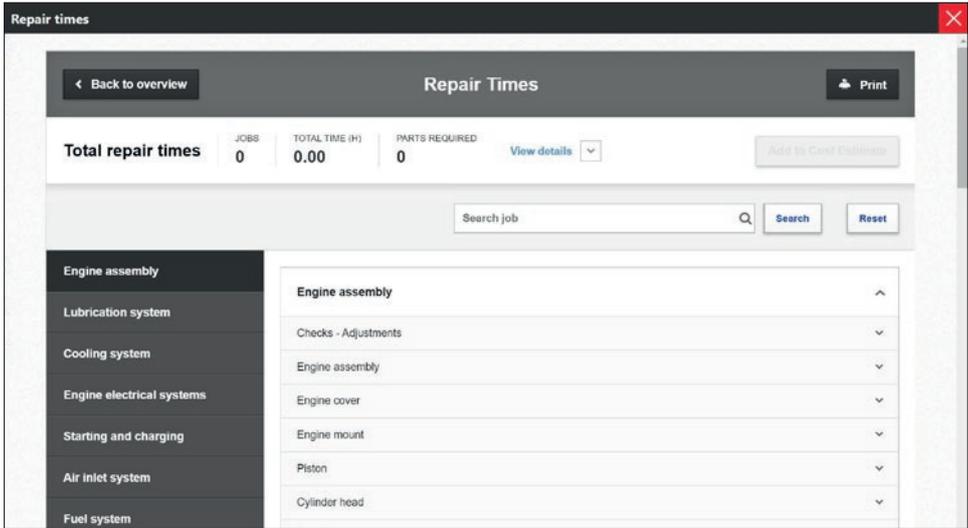

TEXA has decided to enrich TEXPACK CAR, the annual contract that allows receiving all the updates dedicated to cars, with new and interesting contents. Besides the constant coverage update, now it is possible to access the information contained in the **Tech module*** by HaynesPro, such as technical and maintenance data, repair manuals, technical illustrations and drawings, repair times, estimator and recalls.

Another innovation is the introduction of the **TEX@INFO Guided Diagnosis**** service, which provides a **guided troubleshooting procedure integrated in the diagnostic software** thanks to the **Electronics module**, which was also born from the collaboration with HaynesPro. Along with the repair operations, wiring diagrams are also available, with a clear location and identification of fuses, relays and electrical devices, as well as the possibility to view practical procedures, such as how to disconnect and reconnect the battery or how to operate on hybrid and electric vehicles. The TEX@INFO Guided Diagnosis service **also includes the Smart module**, which provides many solved problems and technical service bulletins by OEMs arranged by symptom, cause and solution.

The screenshot displays the TEXA diagnostic software interface. The top navigation bar includes the TEXA logo, navigation icons (back, forward, home, settings, refresh, search), and the version 'IDC5 v.74.0.0'. The breadcrumb trail shows: Menu > Diagnosis > Passenger cars > VOLKSWAGEN > Golf VI [08>13] (5K1) > 1.6i Kat > Hatchback[BSE (75 kW)][09/08>--/13]. The main content area is titled 'Technical data and Checks' and features a 'STAGING' label. Three large blue buttons are visible: 'Tech™' (wrench icon), 'Electronics™' (magnifying glass icon), and 'Smart™' (warning triangle icon). Below these buttons is a list of menu items: Adjustments, Lubricants And Fluids, Maintenances, Recalls, Repair Times, and Technical Illustrations. The left sidebar contains various diagnostic and technical tools. The bottom of the screen shows the date '18/05/2021 15:09' and the copyright notice '© copyright and database right 2016-2021'.

* available for TEXPACK CAR contract subscribers with Plus or Premium license.

NEW IDC5 NEWS SECTION

Starting from this update, the section of the IDC5 software dedicated to the news has been completely renewed. Many new interesting contents will be shared by TEXA to all its customers, who will be able to learn more and more about the many innovations developed for the world of workshops. Thanks to the new news section, it will be possible to stay updated on: communications relating to the call center, available training courses, newly launched products, software updates, agreements and collaborations signed by TEXA with manufacturers, participation in trade fairs. But it will also be possible to view documentation in pdf format, see institutional and product videos directly on the diagnostic tool, and much more.

The news can also be recalled and viewed from the IDC5 page of the vehicle selection.

The news may also contain institutional or product videos, such as those present in the official TEXAcom channel on Youtube.

Diagnosis

HYBRID/ELECTRIC VEHICLES

TEXA's constant commitment in the world of multi-brand diagnosis has always played an essential role in the repair market. The introduction of electric and hybrid vehicles in the market has led us to pay careful attention to the addition of new vehicle selections and the development of new diagnostic systems specifically for this type of vehicles.

Among the main implementations, following are some models recently introduced in the market:

- ***CITROËN C4/SpaceTourer EV***
- ***FIAT 500e***
- ***HONDA e***
- ***KIA XCeed/Ceed/Sorento IV Plug-in Hybrid - Sorento IV Hybrid***
- ***PORSCHE Taycan***
- ***SUZUKI Swace/Across***

IMPORTANT NOTICE FOR CUSTOMERS WHO OWN A PC with Windows 7

Windows 7 is by now an obsolete operating system, no longer supported by Microsoft. To make the most of all the functions in the TEXA IDC5 diagnostic software, we recommend you update your Personal Computer to the latest version of the operating system Windows 10.

IMPORTANT NOTICE

Please note that the software updates are not available for unsupported tools.

For more information, please contact your trusted TEXA dealer.

WARNING

The trademarks and logos of vehicle manufacturers in this document have been used exclusively for information purposes and are used to clarify the compatibility of TEXA products with the models of vehicles identified by the trademarks and logos. Because TEXA products and software are subject to continuous developments and updates, upon reading this document they may not be able to carry out the DIAGNOSTICS of all the models and electronic systems of each vehicle manufacturer mentioned within this document. References to the makes, models and electronic systems within this document must therefore be considered purely indicative and TEXA recommends to always check the list of the "Systems that can be diagnosed" of the product and/or software at TEXA authorized retailers before any purchase. **The images and the vehicle outlines within this document have been included for the sole purpose of making it easier to identify the vehicle category (car, truck, motorbike, etc.) for which the TEXA product and/or software is intended.** The data, descriptions and illustrations may change compared to those described in this document. TEXA S.p.A. reserves the right to make changes to its products without prior notice.
