SOFTWARE
UPDATE

TPS2 9.0.0
TPMS 74.0.0

TPS 9.0.0 - TPMS 74.0.0

The update includes, once again, a large number of developments, the best of the TEXA multi-brand diagnosis dedicated to the TPMS in vehicles light commercial vehicles, motorcycles and heavy-duty vehicles. Using this software for daily workshop activities means having a high-end solution, rich with possibilities and up to date with the new developments connected with the world of tyre maintenance.

To learn more about the extraordinary coverage made available by TEXA, visit the website:

www.texa.com/coverage

It includes important new features for over **40 makes***. In addition to the important diagnostic coverage that TEXA already provides in its devices for the aftermarket sensors, the possibility to manage the HELLA (**) valves as new sensors in the CAR environment has also been added, while for the BIKE platform the **Orange (**)** aftermarket sensor has been added. Furthermore, many firmwares for the management of **EZ-Sensor (*)** valves have been updated and improved.
