MILO MANARA DESIGNS THE TEXA 2026 CALENDAR

The illustration by the renowned Italian comic artist celebrates the partnership with Automobili Lamborghini, but that's not all. In the background, there's also a preview of TEXA's new facility, set to open in 2026.

The end of the year marks an unmissable event for automotive enthusiasts and illustration lovers alike: the launch of the **new TEXA calendar signed by Milo Manara**. This artistic collaboration began in 2008 and has grown stronger year after year, once again delivering a stunning collector's calendar for 2026.

This time, **the artwork pays tribute to TEXA's partnership with Automobili Lamborghini**. The illustration features an elegant woman posing next to a **Temerario**, the latest plug-in hybrid supercar from the Sant'Agata Bolognese brand. Like the **Revuelto**, it is equipped with two inverters and a vehicle control unit designed and manufactured by TEXA. **This collaboration highlights the excellence of TEXA's e-Powertrain division, recognized for cutting-edge technology and impeccable production quality**. For TEXA, it's also a reward for significant investments in this field, driven by the clear ambition to remain a pillar of Italy's automotive industry.

There's another intriguing detail in Milo Manara's illustration: behind the driver stands part of **TEXA's new facility, which will officially open in 2026**. Spanning over 30,000 square meters, it will primarily house the production of garage equipment tools.

Starting January 2026, the new calendar will be delivered to customers subscribed to the "TEXPACK" update service through their trusted dealer. Additionally, at <http://www.texa.com/download/texa-calendar>, after completing a short form, all enthusiasts can download a digital copy.
