## **TEXA CELEBRATES 20 YEARS OF ISO 9001 CERTIFICATION WITH DNV: A JOURNEY OF EXCELLENCE AND INNOVATION**

On Friday, December 11, **TEXA celebrated** an important milestone: **20 years of ISO 9001 certification**, the international standard for Quality Management Systems, first obtained in 2005 from the global certification body **DNV**. This achievement marked the beginning of a long journey of growth and consolidation, with the company progressively adopting the most rigorous standards. Over the years, always in partnership with DNV, TEXA has earned additional key certifications: **IATF 16949, ISO 27001, TISAX**, and **ISO 14001** - confirming its commitment to quality, information security, and environmental sustainability.

Certifications such as ISO 9001, along with the others achieved, **demonstrate TEXA's ability to continuously evolve**, adapting to the demands of a rapidly changing market, the requirements of the manufacturers it collaborates with, and the needs of repair professionals—always ensuring maximum efficiency and reliability. These certifications strengthen trust among partners and customers, opening new opportunities for collaboration. They also guarantee **increasingly secure and sustainable internal processes**, enhancing competitiveness in a fast-moving industry.

The 20-year ISO 9001 milestone was marked by the presence of **Massimo Alvaro, CEO of DNV Business Assurance Italy**, at TEXA's Headquarters, where he presented a commemorative plaque to **TEXA's General Manager, Leonardo Cescon**.

"Our constant commitment to quality is an integral part of TEXA's corporate philosophy and represents the foundation upon which we build every innovation," emphasized **Bruno Vianello, President of TEXA**. "This recognition from DNV is not just a historic milestone, but confirmation of a business culture that has always guided us: investing in safe, sustainable, and excellence-driven processes. This approach allows us to evolve alongside the market and anticipate the needs of manufacturers and workshops, delivering reliable and competitive solutions."

"Accompanying a company like TEXA on a 20-year journey has allowed us to witness its continuous evolution up close," added **Massimo Alvaro, CEO of DNV Business Assurance Italy**. "Renewing the ISO 9001 certification is not only confirmation of a consolidated quality management system, but proof that this approach has become an integral part of the corporate culture and a driver of innovation. The subsequent adoption of more specific standards—such as IATF 16949 and TISAX for automotive, ISO 27001 for information security, and ISO 14001 for environmental management—demonstrates a mature strategic vision in process and risk management. Highlighting this ongoing commitment means recognizing a quality culture that has strengthened over time. This approach builds trust in the market and provides the strongest foundation for tackling future challenges and industry transformations."
