

Simplifying the present,
anticipating the future

Monastier di Treviso, 05 May 2026

**TEXA AND ITALJET SIGN A NEW PARTNERSHIP IN THE TWO-WHEEL WORLD
TEXA diagnostics becomes part of ITALJET's technical offering for its network of
over 300 dealers worldwide.**

TEXA has signed a new agreement with Italjet, the historic manufacturer of high-performance motorcycles and scooters, further strengthening its presence in the official diagnostics segment dedicated to two-wheelers.

The agreement provides that **the motorcycle manufacturer from Castel Guelfo di Bologna will adopt TEXA diagnostic solutions** — specifically the Navigator TXB 2 vehicle interface and IDC6 BIKE software — across its dealer network. From today, therefore, Italjet's 300+ dealers worldwide will be able to rely on a professional and dependable solution to ensure fast and accurate maintenance services for their customers.

"This new agreement once again confirms TEXA's role as the go-to technology partner for motorcycle and scooter manufacturers," said **Mario Giacomella, TEXA Bike & Marine Product Manager**. "Our collaboration with Italjet is a testament to the quality of our diagnostic solutions and our ability to support increasingly structured service networks on a global scale".

Massimo Tartarini, President and CEO of Italjet, commented: "We identified TEXA as the ideal partner to support our global dealer network. Integrating their solutions allows us to further raise the quality of our after-sales service. We want to ensure that our customers, wherever they are in the world, enjoy an experience consistent with the distinctive character and performance of our vehicles".

The partnership with Italjet is part of a well-established path that sees TEXA collaborating with numerous manufacturers in the motorbike sector, providing a comprehensive diagnostic ecosystem that is constantly updated and designed to support their growth within a highly competitive and ever-evolving landscape.
